Press Release

ESP Systems Professionals Celebrates 42 years of Business

Minneapolis, MN, Oct 11, 2010 – This month, ESP Systems Professionals celebrates 42 years in the IT staffing business. A lot has changed in information technology since ESP opened its Minneapolis office in 1968. IBM, Intel and Nokia were just starting to develop computers and programs, social media held a totally different meaning, and kids still knew what “land-lines” were. ESP has evolved with the industry and has placed over 12,000 IT professionals in direct hire, contract, and contract-to-hire roles at Fortune 500, mid-sized corporations, and emerging growth companies in the Twin Cities area.

“We’re proud to still be serving Minneapolis and St. Paul after over forty years of business,” said ESP president, Bob Hildreth. “Our success has always been a direct result of the relationships we’ve formed with local businesses and IT professionals and we thank them for continuing to make us a success today.”

ESP made its first permanent placement in 1969 and placed its first consultant in 1970. In 1987, ESP evolved from primarily a permanent hire firm to offering IT consulting, contract programming and project management options for clients. ESP’s success is built on the company’s ideals and practices of integrity, value and commitment to clients and employees.

"When I think about ESP, I think about working with a great group of people, with great culture and providing high quality service," said Carla Erickson, former Account Manager at ESP.

ESP Systems Professionals focuses exclusively on matching top IT talent with the best corporate opportunities in contract, contract-to-hire and direct hire placements. Clients and candidates rely on ESP for their decades of experience with IT professionals.
