Press Release

ESP Systems Professionals joins SendoutsXchange™

Minneapolis, MN, Jun. 27, 2009 – SendoutsXchange™ is a new capability provided by ESP's On Demand software vendor Sendouts, LLC that connects over 5000 recruiters nationwide. As a member of the exchange, ESP can automatically post candidates and jobs to recruiters throughout the US.

The exchange allows ESP to recruit and place direct hire candidates and consultants nationally with the support of local recruiting professionals. All members of the exchange agree to strict ethical practices and execute partnership agreements. Another significant benefit of the exchange is ESP's opportunity to serve client needs beyond IT. Many of the recruiters who post available candidates and consultants specialize in other industries. Whether finance, accounting, HR, sales, engineering, or others, this network provides ESP with the potential to connect many types of talent to client needs.

ESP Systems Professionals focuses exclusively on matching top IT talent with the best corporate opportunities in contract, contract-to-hire and direct hire placements. Clients and candidates rely on ESP for their decades of experience with IT professionals.
